**NUTRIPLANT**

**Corn**

**NUTRIPLANT SEED TREATMENT**
is applied to seed just prior to planting. It is a nutritional supplement to enhance seedling emergence and growth. The product is available in two forms: powder NUTRIPLANT SD packaged in 25 pound pails and liquid NUTRIPLANT SL packaged in 6 liter jugs.

With **NUTRIPLANT SEED TREATMENT**, Farmers Report:

- Quicker emergence
- Better stands
- Stronger, bigger root systems
- Increased yields
- Increased feed value

**NUTRIPLANT AG**
is a foliar nutritional supplement to enhance crop growth. The genetic potential for any crop is never reached due to stress encountered during the growing season. Plants are more vulnerable and use more nutrients at particular stages of development. **NUTRIPLANT AG** is designed to be applied at these particular stages, to strengthen the plant against everyday environmental stress, leading to better yields and improved quality. The product is available in 2.5 gallon jugs and 30 gallon drums.

With **NUTRIPLANT AG**, Farmers Report:

- Increased resistance to stress
- Stronger stems
- Reduced lodging
- Increased yields

**NUTRIPLANT SEED TREATMENT** and **NUTRIPLANT AG** are intended as supplements to a regular fertilizer program, and will not by themselves provide all the nutrients normally required by plants.

---

**Average U.S.A. Yield Increase**

- **7.0%** for **NUTRIPLANT SD/SL**
- **8.0%** for **NUTRIPLANT AG**

---

- Easy to Apply
- Cost Effective
Results on Corn
The average yield increase in the U.S.A. with NUTRIPLANT SD is 7% (based on 155 trials over 8 years).

Economic Benefit
$65.00 per acre increase
Based on an average yield of 151 bu/acre, 7% increase, and an average price of $6.12/bu.

Application Rates
Apply NUTRIPLANT SD at 8 oz/100 lb of seed (4 oz/50 lb bag).

Apply NUTRIPLANT SL at 4 fl oz/100 lb of seed (2 fl oz/50 lb bag).

Method of Application
Apply NUTRIPLANT SD to the seeds before planting. Application should be made in such a way that all seeds are thoroughly coated. NUTRIPLANT SD can be applied right in the planter box or hopper. Properly treated seeds will have a fine coating of powder.

Apply NUTRIPLANT SL using commercial equipment. Mix seeds until dry and do not stick.

Compatibility
NUTRIPLANT SD/SL is compatible with most seed treatments including inoculums, fungicides and insecticides. It can also be used on pelletized seed.

Storage
Store NUTRIPLANT SD in a dry place at a temperature below 110°F. Do not store in direct sunlight. Keep container tightly closed.

Store NUTRIPLANT SL at a temperature between 110°F and freezing. Keep container tightly closed. Do not store diluted product. Do not store in direct sunlight.

Results on Corn
The average yield increase in the U.S.A. with NUTRIPLANT AG is 8% (based on 26 trials over 8 years).

Economic Benefit
$74.00 per acre increase
Based on an average yield of 151 bu/acre, 8% increase, and an average price of $6.12/bu.

Application Rate
Apply NUTRIPLANT AG at 16 fl oz/acre.

Application Timing
Apply 16 fl oz/acre at the 6 to 8 leaf stage. Application should be made within 10 days of when the majority of the plants reach this stage.

Application
Shake well before using. To co-apply with herbicides, pesticides or fertilizers, dilute 1 part NUTRIPLANT AG with 5 parts water prior to mixing with pre-diluted chemicals. Apply as directed above. A small test area should be treated prior to large scale mixing to determine that no phytotoxicity or undesirable effects occur.

Storage
Store NUTRIPLANT AG at a temperature between 110°F and freezing. Keep container tightly closed. Do not store diluted product. Do not store in direct sunlight.
